

COURSE	TITLE	DURATION
<b>CXD-202-1</b>	Citrix XenDesktop 5.0 Administration	40 H.

**Description:**

This course provides the foundation necessary for administrators to effectively centralize and manage desktops in the datacenter and deliver them as a service to users anywhere. Students will learn how to select a desktop delivery model for each user group based on their needs; build proof-of-concept and production XenDesktop environments; assign virtual desktops to users; and customize the user experience through policies. This course also provides instruction on how to build a Provisioning services farm to enable single-image desktop management and how to host virtual machines on the client device using Citrix XenClient.

**Key Skills:**

Upon successful completion of this course, students are able to:

- Determine the best Flexcast delivery model for each user group.
- Build a XenDesktop proof-of-concept environment.
- Configure a XenServer host for desktop delivery.
- Build and configure a production XenDesktop site.
- Manage virtual desktops as a single entity by creating a desktop catalog.
- Modify a desktop image without impacting user productivity.
- Restrict or allow certain XenDesktop features using policies.
- Monitor site activity and troubleshoot issues in Desktop Director.
- Install and configure Provisioning services.
- Copy a desktop image to a virtual disk that can be streamed to virtual and physical target devices.
- Identify the XenClient infrastructure.
- Install and configure Synchronizer for XenClient.
